B			
SYNCRYSTAL Rose Opal	Synthetic Fluorphlogopite (and) Titanium Dioxide (and) Iron Oxides (and) Tin Oxide	20.00	www.eckart.net

Procedure:

1. Heat up to 85°C and stir until uniform
2. Add phase B and add to phase A
3. Pour into packaging and cool down

- ⇒ SYNCRYSTAL Rose Opal shows in this formulation a unique, intensive and chromatic (interference) flop-effect from pink to blue, while having a subtle beige bulk color
- ⇒ TIXOGEL-CCT is easy to use and avoids settling of the pigments during the mold procedure. It improves the spreadability of the wax formulation and helps to reduce the creep of the oils in the formulation when applied on skin

Stability:

Stable for at least 6 months at RT and 40°C.
Stable for at least 1 month at 50°C.
