

Introducing **SILVERSHINE 410**:
The Pinnacle of Metallic Brilliance

SILVERSHINE 410 The Pinnacle of Metallic Brilliance

Discover the latest addition to our **SILVERSHINE 400** portfolio: **SILVERSHINE 410**. This innovative aluminum effect pigment paste sets a new benchmark in metallic character, boasting exceptional flop and gloss.

What makes SILVERSHINE 410 unique? It is crafted using an innovative grinding technology that cuts the grit more finely and gently. The result is a pigment that stands out with its fine particle size, structureless nature, and high flop. These characteristics make it ideal for use in middle and high-solid-content lacquers.

Versatile and Premier Choice: SILVERSHINE 410 is the ideal pigment for applications requiring a pronounced metallic character and a structureless effect. It is the

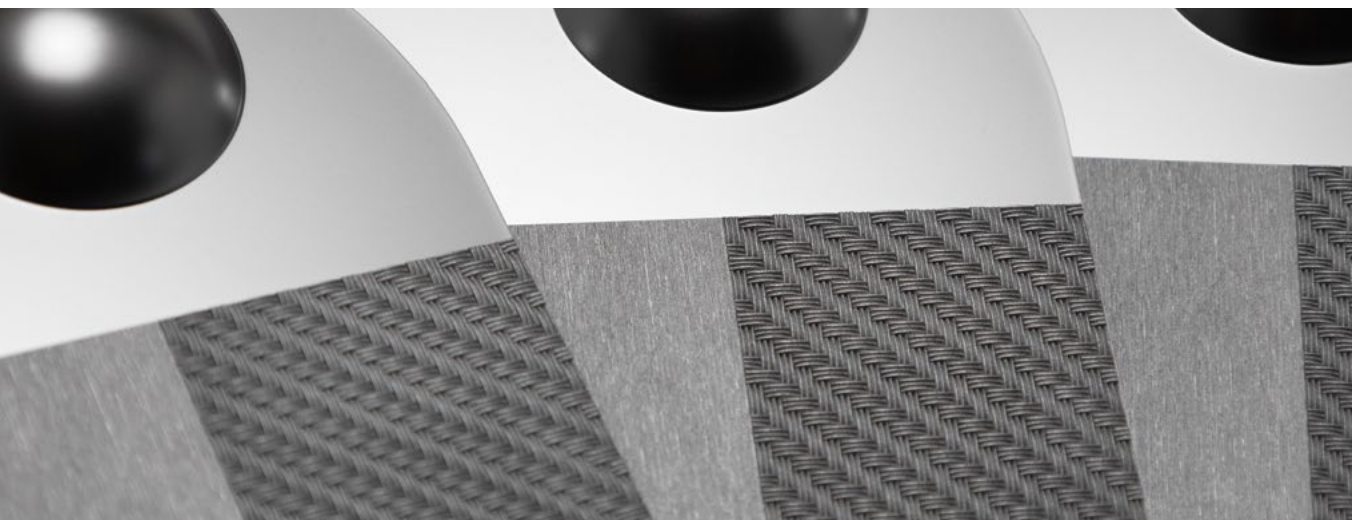

preferred choice for a wide range of solvent-based coating systems, including the automotive industry, automotive trim, consumer electronics, household appliances and all application where a high metallic structure-less effect is mandatory.

KEY FEATURES

- High flop and gloss: achieve stunning visual effects with unparalleled brilliance
- Fine pigment: minimal scattering properties ensure a smooth finish
- Narrow particle size distribution: consistent quality and performance
- Smooth, glossy and structureless metallic effect: ideal for middle and high-solid systems
- Metallic character: remains even when tinted with organic pigments
