Glass-based pigments
The LUXAN K series provide exceptional optical appearance due to its high transparency, unique color purity and intensive luster. On account of its fascinating sparkle effect, these glass pigments can enhance cosmetic and food packaging, sports and leisure applications, automotive interior parts, toys, household and home appliances. LUXAN K can easily be used in all common applications such as extrusion, injection and blow moulding, blown film or cast film extrusion. LUXAN K is suitable for polyolefins, PVC as well as engineering resin like polycarbonate, styrenics, acrylics, nylons, etc.

The benefits of LUXAN K glass pigments are:
- High chroma and color intensity
- Sparkle effect can be achieved even at low pigmentation levels
- Outstanding transparency, i.e. ideally suited for transparent resins
- Approved for food packaging applications
