SILVERSHINE 412 Aluminium Paste

Version	Revision Date:	SDS Number:	Print Date: 16.04.2024
5.0	15.03.2024	102000024923	Date of first issue: 24.08.2016

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier		
Trade name	: SILVERSHINE 412 Aluminium Paste	
Product code	: 022579G60	
1 2 Relevant identified uses of	the substance or mixture and uses advised a	anainst
		agamsi
Use of the Substance/Mixture	: Colouring agents, pigments	agamst

1.3 Details of the supplier of the safety data sheet

Company	: ECKART GmbH Guentersthal 4 91235 Hartenstein
Telephone	: +499152770
Telefax	: +499152777008
E-mail address of person responsible for the SDS	: msds.eckart@altana.com

1.4 Emergency telephone number

NCEC: +44 1235 239670 (Europe) Call and response in your language is possible. Contract no.: ECKART29003-NCEC.

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Specific target organ toxicity - single
exposure, Category 3, Central nervous
systemH336: May cause drowsiness or dizziness.Specific target organ toxicity - single
exposure, Category 3, Respiratory
systemH335: May cause respiratory irritation.Long-term (chronic) aquatic hazard,
Category 2H411: Toxic to aquatic life with long lasting effects.

SECTION 4: First aid measures

4.1 Description of first aid measures

General advice		Move the victim to fresh air.
		Move out of dangerous area. Show this safety data sheet to the doctor in attendance.
If inhaled	:	If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician.
In case of skin contact	:	Wash off immediately with soap and plenty of water.
In case of eye contact	:	Immediately flush eye(s) with plenty of water.
		Flush eyes with water as a precaution. Remove contact lenses. Keep eye wide open while rinsing.
If swallowed	:	Keep respiratory tract clear. Do not give milk or alcoholic beverages. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician.

		20110110	Do not flush with water. Keep in suitable, closed containers for disposal.

6.4 Reference to other sections

For personal protection see section 8.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Advice on safe handling	:	Keep away from heat and sources of ignition. Avoid dust formation. Ensure adequate ventilation. Avoid formation of respirable particles. Do not breathe vapours/dust. Avoid exposure - obtain special instructions before use. For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Provide sufficient air exchange and/or exhaust in work rooms. Dispose of rinse water in accordance with local and national regulations.
Advice on protection against fire and explosion	:	Keep away from open flames, hot surfaces and sources of ignition. Earthing of containers and apparatuses is essential. Avoid dust formation.
Hygiene measures	:	Wash hands before breaks and at the end of workday.
7.2 Conditions for safe storage, in Requirements for storage areas and containers	incl :	uding any incompatibilities Store in original container. Keep containers tightly closed in a cool, well-ventilated place. Keep container closed when not in use. Keep away from sources of ignition - No smoking.
		Keep container tightly closed in a dry and well-ventilated place. Observe label precautions. Electrical installations / working materials must comply with the technological safety standards.

				dust)			
			Further inform	nation: For the purp	oses of these limits, respirable	dust and	
					s of airborne dust which will be		
					accordance with the methods (
			MDHS14/4 G	sampling and gravimetric anal	ysis or		
			respirable, thoracic and inhalable aerosols., The COSHH definition of a substance hazardous to health includes dust of any kind when present a concentration in air equal to or greater than 10 mg.m-3 8-hour TWA of				
			inhalable dust	r TWA of respirable dust. This	means that		
			any dust will be subject to COSHH if people are exposed to du				
				signed specific WELs and exp			

any dust will be subject to COSHH if people are exposed to dust above these	ĺ
levels. Some dusts have been assigned specific WELs and exposure to these	
must comply with the appropriate limits., Most industrial dusts contain	ĺ
particles of a wide range of sizes. The behaviour, deposition and fate of any	ĺ
particular particle after entry into the human respiratory system, and the body	ĺ
response that it elicits, depend on the nature and size of the particle. HSE	
distinguishes two size fractions for limit-setting purposes termed 'inhalable'	
and 'respirable'., Inhalable dust approximates to the fraction of airborne	
material that enters the nose and mouth during breathing and is therefore	
available for deposition in the respiratory tract. Respirable dust approximates	
to the fraction that penetrates to the gas exchange region of the lung. Fuller	
definitions and explanatory material are given in MDHS14/4., Where dusts	ĺ
contain components that have their own assigned WEL, all the relevant limits	
should be complied with., Where no specific short-term exposure limit is listed,	ĺ
a figure three times the long-term exposure limit should be used.	ĺ
	levels. Some dusts have been assigned specific WELs and exposure to these must comply with the appropriate limits., Most industrial dusts contain particles of a wide range of sizes. The behaviour, deposition and fate of any particular particle after entry into the human respiratory system, and the body response that it elicits, depend on the nature and size of the particle. HSE distinguishes two size fractions for limit-setting purposes termed 'inhalable' and 'respirable'., Inhalable dust approximates to the fraction of airborne material that enters the nose and mouth during breathing and is therefore available for deposition in the respiratory tract. Respirable dust approximates to the fraction that penetrates to the gas exchange region of the lung. Fuller definitions and explanatory material are given in MDHS14/4., Where dusts contain components that have their own assigned WEL, all the relevant limits should be complied with., Where no specific short-term exposure limit is listed,

Derived No Effect Level (DNEL) according to Regulation (EC) No. 1907/2006:

Substance name	End Use	Exposure routes	Potential health effects	Value
aluminium powder (stabilised)	Workers	Inhalation	Long-term systemic effects	3.72 mg/m3
	Workers	Inhalation	Long-term local effects	3.72 mg/m3
	Consumers	Oral	Long-term systemic effects	3.95 mg/kg

8.2 Exposure controls

Personal protective equipment Eye/face protection Safety glasses : Hand protection Material Solvent-resistant gloves : Remarks Take note of the information given by the producer : concerning permeability and break through times, and of special workplace conditions (mechanical strain, duration of contact). The exact break through time can be obtained from the protective glove producer and this has to be observed. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. Recommended preventive skin protection Skin should be washed after contact. The suitability for a specific workplace should be discussed with the producers of the protective gloves. Skin and body protection Long sleeved clothing : Safety shoes Choose body protection according to the amount and concentration of the dangerous substance at the work place. Choose body protection according to the amount and

SECTION 10: Stability and reactivity

10.1 Reactivity

No decomposition if stored and applied as directed.

10.2 Chemical stability

No decomposition if stored and applied as directed.

10.3 Possibility of hazardous reactions

Hazardous reactions	:	Reacts with alkalis, acids, halogenes and oxidizing agents. Contact with acids and alkalis may release hydrogen. Mixture reacts slowly with water resulting in evolution of hydrogen. Vapour/air-mixtures are explosive at intense warming. Stable under recommended storage conditions.
10.4 Conditions to avoid		
Conditions to avoid	:	Do not allow to dry.
		No data available
10.5 Incompatible materials		
Materials to avoid	:	Acids Bases Oxidizing agents Highly halogenated compounds

SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Acute toxicity

Not classified based on available information.

Components:

aluminium powder (stabilised)):
Acute inhalation toxicity :	: LC50 (Rat): > 5 mg/l Exposure time: 4 h Test atmosphere: dust/mist

Solvent naphtha (petroleum), light arom.:

- Acute oral toxicity : LD50 (Rat): 3,492 mg/kg
- Acute dermal toxicity : LD50 (Rabbit): > 3,160 mg/kg

Naphtha (petroleum), hydrotreated heavy; Low boiling point ydrogen treated naphtha:

Acute oral toxicity	:	LD50 (Rat): > 5,000 mg/kg
Acute inhalation toxicity	:	LC50 (Rat): Test atmosphere: vapour Remarks: An LC50/inhalation/4h/rat could not be determined because no mortality of rats was observed at the maximum achievable concentration.

Acute dermal toxicity	: LD50 (Rabbit): > 5,000 mg/kg
-----------------------	--------------------------------

Skin corrosion/irritation

Repeated exposure may cause skin dryness or cracking.

Components:

Solvent naphtha (petroleum), light arom.:Result: Repeated exposure may cause skin dryness or cracking.

Naphtha (petroleum),	hydrotreated heavy; Low boiling point ydrogen treated naphtha:
Result	: Repeated exposure may cause skin dryness or cracking.

Serious eye damage/eye irritation

Not classified based on available information.

Product:

Remarks : Product dust may be irritating to eyes, skin and respiratory

The transport classification(s) provided herein are for informational purposes only, and solely based upon the properties of the unpackaged material as it is described within this Safety Data Sheet. Transportation classifications may vary by mode of transportation, package sizes, and variations in regional or country regulations.

14.7 Maritime transport in bulk according to IMO instruments

Not applicable for product as supplied.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Relevant EU provisions transposed through retained EU law

REACH - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles (Annex XVII)	:	Conditions of restriction for the following entries should be considered: aluminium powder (stabilised) (Number on list 40) Solvent naphtha (petroleum), light arom. (Number on list 3) Naphtha (petroleum), hydrotreated heavy; Low boiling point ydrogen treated naphtha (Number on list 3)
UK REACH Candidate list of substances of very high concern (SVHC) for Authorisation	:	Not applicable
The Persistent Organic Pollutants Regulations (retained Regulation (EU) 2019/1021 as amended for Great Britain)	:	Not applicable
Regulation (EC) No 1005/2009 on substances that deplete the ozone layer	:	Not applicable
UK REACH List of substances subject to authorisation (Annex XIV)	:	Not applicable

15.2 Chemical safety assessment

No data available

SECTION 16: Other information

Full text of H-Statements

H226	: Flammable liquid and vapour.
H228	: Flammable solid.
H304	: May be fatal if swallowed and enters airways.
