#### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

#### Classification (REGULATION (EC) No 1272/2008)

| Acute toxicity, Category 4          | H302: Harmful if swallowed.                        |
|-------------------------------------|----------------------------------------------------|
| Eye irritation, Category 2          | H319: Causes serious eye irritation.               |
| Short-term (acute) aquatic hazard,  | H400: Very toxic to aquatic life.                  |
| Category 1                          |                                                    |
| Long-term (chronic) aquatic hazard, | H410: Very toxic to aquatic life with long lasting |
| Category 1                          | effects.                                           |
|                                     |                                                    |

| Hand protection<br>Material : | Solvent-resistant gloves (butyl-rubber)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |  |  |  |
| Remarks :                     | Take note of the information given by the producer<br>concerning permeability and break through times, and of<br>special workplace conditions (mechanical strain, duration of<br>contact). The exact break through time can be obtained from<br>the protective glove producer and this has to be observed.<br>Please observe the instructions regarding permeability and<br>breakthrough time which are provided by the supplier of the<br>gloves. Also take into consideration the specific local<br>conditions under which the product is used, such as the<br>danger of cuts, abrasion, and the contact time.<br>Recommended preventive skin protection Skin should be<br>washed after contact. The suitability for a specific workplace<br>should be discussed with the producers of the protective<br>gloves. |  |  |  |
| Skin and body protection :    | Impervious clothing<br>Choose body protection according to the amount and<br>concentration of the dangerous substance at the work place.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |  |  |  |
| Respiratory protection :      | Use suitable breathing protection if workplace concentration requires.<br>Equipment should conform to EN 14387                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |  |  |

#### 9.2 Other information

No data available

#### **SECTION 10: Stability and reactivity**

#### 10.1 Reactivity

No decomposition if stored and applied as directed.

#### 10.2 Chemical stability

No decomposition if stored and applied as directed.

#### 10.3 Possibility of hazardous reactions

: Stable under recommended storage conditions.

No decomposition if stored and applied as directed.

#### 10.4 Conditions to avoid

Hazardous reactions

Conditions to avoid : Do not allow evaporation to dryness.

No data available

#### 10.5 Incompatible materials

#### 10.6 Hazardous decomposition products

Thermal decomposition : Carbon monoxide, carbon dioxide and unburned hydrocarbons (smoke).

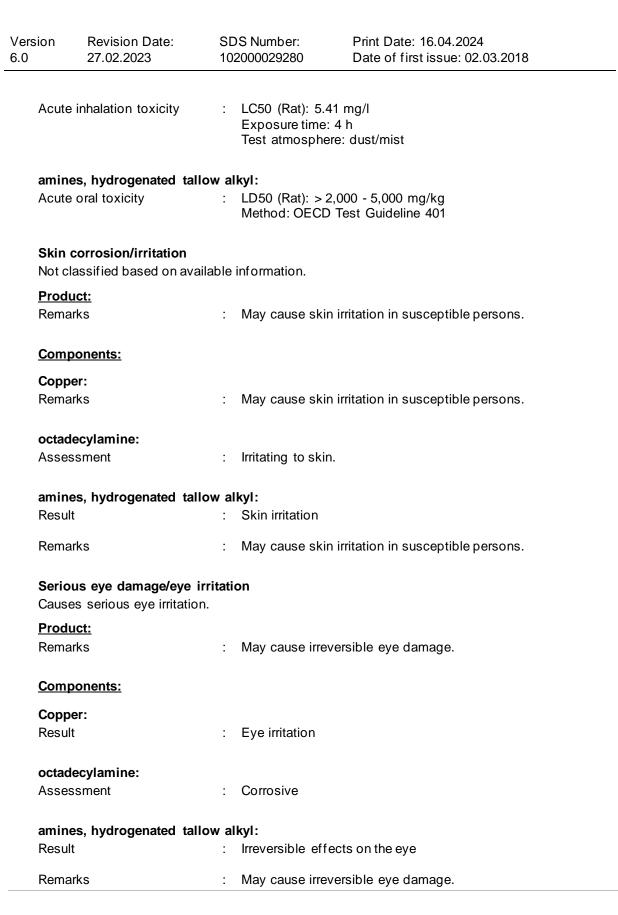

### **SECTION 11: Toxicological information**

#### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

| Acute toxicity<br>Harmful if swallowed. |                                                                                 |
|-----------------------------------------|---------------------------------------------------------------------------------|
| Product:                                |                                                                                 |
| Acute oral toxicity                     | : Acute toxicity estimate: 1,316 mg/kg<br>Method: Calculation method            |
| Components:                             |                                                                                 |
| Copper:                                 |                                                                                 |
| Acute oral toxicity                     | : Assessment: The component/mixture is moderately toxic after single ingestion. |
| zinc powder — zinc dus                  | t (stabilised):                                                                 |
| Acute oral toxicity                     | (Rat): > 2 000 mg/kg                                                            |

#### Respiratory or skin sensitisation

#### Skin sensitisation

Not classified based on available information.

#### **Respiratory sensitisation**

Not classified based on available information.

#### Germ cell mutagenicity

Not classified based on available information.

#### Carcinogenicity

Not classified based on available information.

#### **Reproductive toxicity**

Not classified based on available information.

#### STOT - single exposure

Not classified based on available information.

#### STOT - repeated exposure

Not classified based on available information.

#### Components:

#### octadecylamine:

| Exposure routes | : | Ingestion                                                |
|-----------------|---|----------------------------------------------------------|
| Target Organs   | : | Liver, digestive system, Immune system                   |
| Assessment      | : | May cause damage to organs through prolonged or repeated |
|                 |   | exposure.                                                |

#### amines, hydrogenated tallow alkyl:

| Target Organs | : | Liver, Gastrointestinal tract, Immune system                    |
|---------------|---|-----------------------------------------------------------------|
| Assessment    | : | The substance or mixture is classified as specific target organ |
|               |   | toxicant, repeated exposure, category 2.                        |

#### Aspiration toxicity

Not classified based on available information.

#### **Components:**

#### octadecylamine:

May be fatal if swallowed and enters airways.

#### amines, hydrogenated tallow alkyl:

May be fatal if swallowed and enters airways.

#### **SECTION 16: Other information**

#### Full text of H-Statements

| H302                            | :   | Harmful if swallowed.                                              |
|---------------------------------|-----|--------------------------------------------------------------------|
| H304                            | :   | May be fatal if swallowed and enters airways.                      |
| H315                            | :   | Causes skin irritation.                                            |
| H318                            | :   | Causes serious eye damage.                                         |
| H319                            | :   | Causes serious eye irritation.                                     |
| H373                            | :   | May cause damage to organs through prolonged or repeated exposure. |
| H400                            | :   | Very toxic to aquatic life.                                        |
| H410                            | :   | Very toxic to aquatic life with long lasting effects.              |
| Full text of other abbreviation | ons |                                                                    |
| Acute Tox.                      | :   | Acute toxicity                                                     |
| Aquatic Acute                   | :   | Short-term (acute) aquatic hazard                                  |
| Aquatic Chronic                 | :   | Long-term (chronic) aquatic hazard                                 |
| Asp. Tox.                       | :   | Aspiration hazard                                                  |
| Eye Dam.                        | :   | Serious eye damage                                                 |
| Eye Irrit.                      | :   | Eye irritation                                                     |
| Skin Irrit.                     | :   | Skin irritation                                                    |
| STOT RE                         | :   | Specific target organ toxicity - repeated exposure                 |
| GB EH40                         | :   | UK. EH40 WEL - Workplace Exposure Limits                           |
| GB EH40 / TWA                   | :   | Long-term exposure limit (8-hour TWA reference period)             |
| GB EH40 / STEL                  | :   | Short-term exposure limit (15-minute reference period)             |
|                                 |     |                                                                    |
